SKILLS

LANGUAGES
- C#
- Python
- JavaScript
- Bash
- SQL

WEB TECHNOLOGY
- HTML5
- CSS3
- XML
- JSON

.NET
- ASP.NET Core
- Entity Framework

DATABASE
- MySQL
- PostgreSQL
- MongoDB

FRONTEND
- Angular
- React
- Three.js

DEVOPS
- Debian/Linux
- Docker
- Kubernetes
- Git
- CI/CD
- Cloudflare

CREATIVE
- Photoshop
- Illustrator
- After Effects
- Blender
- Godot

LANGUAGES

- English (C2)
- Hebrew (A1)

SUMMARY

C# (.NET / ASP.NET Core) and Python developer working primarily in Linux environments. Combines full stack development with a strong interest in security, networking, Docker, and DevOps practices.

EXPERIENCE

Full Stack Developer (Freelance)
Tech-Jcorp, Remote | 01/2026 - Present
Developed full stack client websites and web applications using Python/Django and React, REST APIs, operational dashboards, and database backends featuring Role Based Access Control permissions and telemetry tracking, alongside static front ends built with HTML and CSS. Configured and managed static and dynamic sites on Cloudflare, handling SEO setup, email routing, ongoing hosting administration, and infrastructure DevOps.
- Collaborated with a specialist graphic designer on brand identity work, and stepped in to provide design support directly when workload required it.

Full Stack Engineer (C#)
Don't Waste Group, Onsite | 01/2018 - 01/2020
Maintained and fixed bugs in legacy administrative systems built with Visual Basic, CSS, and Bootstrap, working under a senior developer's guidance. Developed cross platform mobile applications in C# (.NET Framework and .NET) for waste administration and operational tracking, implementing database logic, RESTful APIs, and responsive front end interfaces.

Back End Developer (PHP)
EpicDev, Onsite | 01/2016 - 01/2017
Developed PHP backend components and custom CMS features for client websites, with responsive front ends in HTML/CSS/JavaScript. Supported the team with video editing, motion graphics, and vector assets as needed.

International English Teacher
The TEFL Academy, remote | 01/2021 - 01/2025
Transitioned into corporate English training following the COVID 19 lockdown. Studied Python, Django, and React while delivering Business English training to corporate professionals, and maintained technical skills through Linux administration, Bash scripting, networking practice, and DevOps infrastructure management in personal time.

EDUCATION

Higher Certificate, Information Systems
CTI Education Group | 01/2016 - 01/2017
Focus: Software Engineering (C#, OOP, Databases), Systems Administration, Information Security

National Senior Certificate
Fourways High School | 01/2006 - 01/2011

INTERESTS

- Chess (actively working on my rating)
- Exploring Rust for memory safe and security focused development.
- Exploring Solidity for smart contract development and blockchain protocols.

PROJECTS

VoteIdeaBoard

TypeScript, Python, .NET concepts, Django, Celery, Redis, React, Three.js, Blender

Designed and built an internal feature voting tool utilising Django, Celery, Redis, and React, engineered to prevent database level race conditions under heavy concurrent load and guarantee vote integrity. Integrated custom Three.js scenes and Blender visual assets, bridging backend concurrency work with interactive frontend design.

floccusBackupGuard

Shell, Linux, inotify, systemd, Git, WebDAV

Built an event driven, automated backup pipeline for floccus/WebDAV bookmark sync using inotify, systemd, and Git versioned snapshots, with point in time recovery to protect against data loss from third party sync clients.
